PREFACE

This issue of the Northern Territory Statistical Summary is the sixteenth of the series introduced by this Bureau in 1960.

In general it follows the lines of the previous issues. The contents of the previous issue have been advanced wherever possible. Tables relating to the census of population show details from the 1971 Census of Population and Housing, and some tables from the Population Counts held at the end of June 1973 and 1974 and March 1975 have been included.

I wish to thank the officers of the various branches of the Department of the Northern Territory and other departments who supplied information for inclusion in the Summary, and for their valuable assistance in collecting much of this information.

W. H. MITCHELL
Statistician, Northern Territory

(a) Total increase in population during the year ended 30 June expressed as a proportion (per cent) of the population at the end of the previous year ended 30 June. For dates prior to 1937 the figure given is the average annual rate of growth (per cent) from the previous date. (b) The figures from 1947 onwards relate to Greater Darwin. (c) Population at Census, 3 April 1911. (d) No satisfactory estimate available. (e) Population at Census, 4 April 1921. (f) Census. (g) Includes an estimate for full-blood Aborigines out of contact at the Census. (h) Based on an estimate of the population at 30 June 1961 excluding full-blood Aborigines. (i) Population Count. (j) Decrease due to effect of cyclone 'Tracy' on Darwin population.

NOTE: Figures before 1961 exclude particulars of full-blood Aborigines as required by Section 127 of the Constitution prior to its repeal in 1967.

**TABLE 7.—POPULATION IN LOCAL GOVERNMENT AREAS
NORTHERN TERRITORY, CENSUSES 1966 AND 1971**

For 1971 Census purposes, the use of Police Districts as tabulation areas has been abandoned. The only local government area in the Northern Territory is the City of Darwin. For census purposes two areas have been treated as local government areas: Proposed Greater Darwin and the Balance of the Territory.

(a) Persons who on Census night were on board ships in Australian ports or travelling between two Australian ports or who were enumerated on long distance trains, buses or aircraft.

NOTE: At the 1966 Census, in conformity with Section 127 of the Constitution, Aborigines were excluded from the published population. In 1967 the Constitution was altered to remove this provision, and the 1971 Census therefore includes Aborigines. In order to provide comparability between the two censuses the 1966 populations in this statement have been amended to include Aborigines and therefore differ from the 1966 populations previously published.

For explanatory notes and criteria for the delimitation of urban boundaries see *Census of Population and Housing, 30 June 1971—Field Count Statement No. 9* (Reference Number 2.79).

NOTE. The questions on race at Censuses prior to 1971 were designed to ascertain *racial mixture*. With the 1967 repeal of Section 127 of the Constitution (under which Aborigines of more than half descent were excluded from the count of the Australian population), this approach was abandoned and at the 1971 Census the question on race was re-designed to obtain *the race with which a person identifies*. Because of this different approach, race figures from the 1971 Census are not comparable with those from previous Censuses.

NOTE. Because of the voluntary nature of the question on religion (Section 21 of the *Census and Statistics Act* 1905-1973 states that no person shall be liable to a penalty for not answering the question on religion), many persons do not give details of their religion and this accounts for the comparatively large number of persons in the 'not stated' category. In the 1971 Census at the request of a large number of users of the data the instruction 'if no religion, write "none"' was added to the question. The result has been a significant rise in the 'no religion' category compared with previous censuses and a fall in the 'not stated' category.

The classification of religious denominations was enlarged for the 1971 Census with the addition of 'Jehovah's Witness' and 'Muslim' previously included under 'Other Christian' and 'Other non-Christian' respectively.

Persons aged 5-14 years who failed to answer the question on schooling were allocated a level based on the modal level for their ages in the Northern Territory, using the most current available information on the distribution of the school population by age.

Note. For the 1971 Census, qualifications were classified to five major levels. The levels were determined as follows:

Doctorate, Master's Degree or equivalent conferred by a university in recognition of substantial studies beyond the Bachelor level.

Bachelor degree, post-graduate diploma or equivalent usually conferred by a university following a period of at least 3 years full-time study or equivalent part-time study.

Other tertiary (excluding university degree or equivalent) a level relating to qualifications obtained following substantial advanced study beyond matriculation conferred by institutions and professional associations, e.g. Associate of Australian Society of Accountants, Diploma in Business Studies, Teaching Certificate, Diploma of Engineering.

Technician, a level which required theoretical knowledge, as well as practical skills, e.g. wool classing or nursing. Certificates issued by technical colleges following periods of 4 or 5 years part-time study after passing intermediate or final secondary school examinations are classified as 'technician'.

Trade, formal recognition of competency in a skilled manual occupation which is usually obtained through an apprenticeship and satisfactory progress in part-time studies concurrently with practical training (e.g. plumber, fitter, compositor, carpenter, hairdresser).

Some qualifications could not be classified to any of the above levels. Most of these relate to short specialised courses in such fields as typewriting and shorthand, farm book-keeping, dressmaking, automotive maintenance.

EXPLANATORY NOTES: LABOUR FORCE, CENSUS, 30 JUNE 1971

For the 1971 Census, the term 'labour force' is used in place of 'work force' in conformity with the Bureau's quarterly population survey and with international usage.

The labour force is defined as those persons aged 15 years and over who answered 'yes' to any of the following questions on the 1971 Census Schedule:

- (a) Did this person have a full or part-time job, or business or farm of any kind last week?
- (b) Did this person do any work at all last week for payment or profit?
- (c) Was this person temporarily laid off by his employer without pay for the whole of last week?
- (d) Did this person look for work last week?

Thus the labour force comprises those persons who worked, those who had a job from which they were temporarily absent, those who were temporarily laid off without pay for the whole of the reference week *and* those who did not work, did not have a job and were actively looking for work.

Persons helping but not receiving wages or salary who usually worked less than 15 hours a week are excluded from the labour force. Bonded trainees (including trainee teachers) and cadets engaged in full-time study at educational institutions are also excluded, even though such institutions were conducted by their employer.

The unemployed members of the labour force are those persons who answered 'No' to Questions (a) and (b) and 'Yes' to Question (d) *AND* those who answered 'Yes' to Question (a), 'No' to Question (b) and 'Yes' to Question (c). Thus the unemployed consist of those persons who did no work during the reference week and either looked for work (having no job) or were temporarily laid off from a job.

This approach conforms closely to the recommendations of the Eighth International Conference of Labour Statisticians held in Geneva in 1954 and to the approach used at the 1966 Census.

According to the definition any labour force activity during the previous week, however little, results in the person being counted in the labour force.

Thus many persons whose main activity is not a labour force one (e.g. housewife, full-time student) are drawn into the labour force by virtue of part-time or occasional labour force activity in the previous week. Answers to the question on usual major activity indicate that there were substantially more of such persons at the Census of 1971 than at the Census of 1966 and that they were predominantly females.

On the other hand, the definition excludes persons who may frequently or usually participate in the labour force but who in the previous week happened to have withdrawn from the labour force. Answers to the question on usual major activity indicate that there were substantially more of such persons at the Census of 1971 than at the Census of 1966, especially among males.

A similar definition of the labour force is used in the quarterly population sample survey conducted by the Bureau by the method of personal interview. This survey is used to measure changes in the labour force from quarter to quarter in the intercensal period.

Evidence from post-enumeration surveys and pilot tests indicates that the personal interview approach tends to identify a larger number of persons as in the labour force than does the filling in of the census questions on the schedule by the householder and that this tendency has increased between the 1966 and 1971 Censuses.

The above considerations should be borne in mind if comparisons of the total labour force or labour force participation rates are made between the 1966 and 1971 Censuses, or between the 1971 Census and the 1971 labour force quarterly estimates.

(a) For the 1911–1961 Censuses, excludes dwellings occupied solely by full-blood Aborigines. For the 1966 and 1971 Censuses, such dwellings are included. (b) 'Unoccupied dwellings' include vacant dwellings available for sale or renting; dwellings such as 'week-enders', 'holiday home', 'second home', 'seasonal workers' quarters', which were not occupied on the night of the census; dwellings normally occupied but whose usual occupants were temporarily absent on the night of the census; newly completed dwellings whose owners or tenants had not entered into occupation on the night of the census; dwellings described as 'to be demolished', 'condemned', 'deceased estate', 'exhibition home', etc. The total number of unoccupied dwellings shown for any area must not, therefore, be read as representing the number of vacant houses and flats available for sale or letting.

NOTE. From the 1966 Census the following definitions were used as a basis for the Census of Dwellings:

(a) An 'occupied dwelling' is any habitation occupied by a household group and may comprise the whole or only part of a building. (b) A 'household group' is a person or group of persons living as a domestic unit with common eating arrangements. The lack of a structural definition of a dwelling is not considered a significant disadvantage in Australia as the majority of households do in fact each occupy one distinct dwelling structure (i.e. a house or a self-contained flat).

TABLE 40.—DWELLINGS IN LOCAL GOVERNMENT AREAS: NORTHERN TERRITORY, CENSUSES, 1966 AND 1971

NOTE. For 1971 Census purposes the use of Police Districts as tabulation areas has been abandoned. The only local government area in the Northern Territory is the City of Darwin. For census purposes two areas have been treated as 'local government areas'; Proposed Greater Darwin and the balance of the Territory.

SURVEYS OF WEEKLY EARNINGS AND HOURS

Surveys conducted for the last pay-period in October each year provide statistics of average weekly earnings (i.e. gross earnings before taxation and other deductions) and average weekly hours paid for. Statistics for employees in the Northern Territory were first collected in October 1972. The surveys exclude employees of private employers not subject to payroll tax, employees in agriculture and in private households and defence forces. For detailed statistics, explanatory notes and definitions concerning the survey, reference should be made to publications containing survey results (Reference Nos. 6.36 and 6.40).

(a) The statistics shown are based on returns received from government authorities, contractors and owner-builders who undertake the erection of buildings. Details obtained from government authorities and building contractors refer to all areas. Details for owner-builders cover only proclaimed health areas. Figures for dwellings exclude temporary and makeshift dwellings. Each dwelling is counted as an individual living unit. Minor additions and alterations, renovations and repairs are excluded. Prior to 1 July 1966, additions of \$10,000 and over to existing buildings are included with buildings. From 1 July 1966, alterations and/or additions of \$10,000 and over are included in buildings. The values of buildings exclude the value of land and represent the estimated value of buildings on completion. (b) The values shown represent the estimated value of work carried out on buildings during the year. For any building the sum of these values obtained during its construction equals the value of the building on completion.

TABLE 96.—RECEIPTS AND OUTLAY: NORTHERN TERRITORY

This table represents a reclassification of identifiable receipts and outlay relating to the Northern Territory in a National Accounts form. It covers the transactions of the Australian Government in respect of the Northern Territory in the Consolidated Revenue Fund and the following trust funds: Aborigines Benefits, Aboriginal Advancement (part), Northern Territory Government Settlements Canteens, Northern Territory Housing Commission, Northern Territory Housing Loans and Northern Territory Transport. Details of the financial transactions of the following public corporations are also included: The Northern Territory Port Authority, the Northern Territory Housing Commission and the Darwin City Council.

Revenue derived by the Commonwealth from income taxes, customs duties, etc., levied in the Northern Territory and expenditure on items of a national character such as defence, civil aviation, railways, etc., and payments to residents from the National Welfare Fund are *not* included. Details of expenditure from the National Welfare Fund may be found in Tables 115 to 119. Details of receipts from and expenditure on other items mentioned above are not available.
